

PowerPoint Alchemy

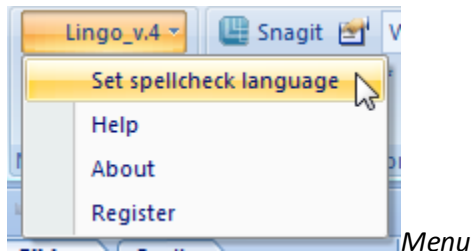

PowerPoint Lingo

Install

Macro security must be set to medium or Low in earlier versions or in version 2007 “Disable with prompt”.

****IMPORTANT** Close PowerPoint before continuing**

With PowerPoint CLOSED run the installer (msi) file to install the Add In. Please do not change the install path. In versions before 2007 a new menu will appear. In 2007 the ribbon entry will be in the Animation tab. If the toolbar does not appear, then In 2002/3 Tools > Add Ins > Add New and add Lingo6.ppa. In 2007 get to the same dialogue in Office button > PowerPoint Options > Add Ins > Manage PowerPoint Options.

Using Lingo

Simply select “SpellCheck Language” from the new toolbar and then choose your language and “All” or “Selected” slides and it’s done.

Lingo changes the language on masters, in diagrams, groups and empty textboxes. Please note it cannot change the language in Smart Art in version 2007 or in charts.

Demo Version

The demo is fully functional but will expire in 14 days. The full version can be purchased from http://www.pptalchemy.co.uk/Real_Lingo.html

Uninstall

To uninstall Lingo you must use the provided uninstall program which can be accessed from the control panel in Windows or by re-running the msi file.
